SAFETY SMART LTD

SafetySmart
Health & Safety Consultants

ABOUT US

Safety Smart is a Health and Safety and Risk Management consultancy that offers bespoke Health and Safety Management Systems throughout the UK to a variety of industries including construction, retail, property management, engineering and facilities management. Safety Smart is a consultancy that relies on customer satisfaction and a right first time attitude to our work, rather than long, expensive and unnecessary contracts.

We are committed to building strong customer relationships which create excellent value for you and us.

In addition, we are the very proud winners of the inaugural Health and Safety Executive Innovation in Safety award.

More about our services can be found at www.safety-smart.co.uk

THE PROJECT

Safety Smart were appointed to provide Health and Safety support throughout the fit out and refurbishment of Dow's new UK & Ireland headquarters at Cheadle Royal Business Park in Stockport, Greater Manchester.

The remit included administering the daily permit to work system and monitoring Health and Safety standards for all site work to ensure that a positive safety culture was developed, adhering to Dow's strict requirements.

Safety Smart consultants were on-site for the duration of the project and the role included conducting site safety audits and the review of contractors' risk assessments and method statements.

The new facility is a two-floor, 26,037 sq. ft. self-contained unit to house the national management team, technical and sales office, and product research and development (R&D) facility.

The project ran from February 2021 through to the end of September 2021 with a Safety Smart Consultant on site every day.

come across. Thank
you Anthony
”

THANK YOU

Safety Smart would like to extend our thanks to all at Dow and Knight Frank for the opportunity to be part of this project. It has been a positive experience for all involved and we have very much enjoyed working with you and your team.

We would appreciate being considered for any future opportunities for collaboration.

Thank you
